

# NINETEENTH ANNUAL STUART A. KLEIT SYMPOSIUM

## COURSE DESCRIPTION

This one-day multi-disciplinary seminar will enhance the understanding of advances in care of the chronic kidney disease patient and provide up-to-date information to nephrology and primary care practitioners. Participants will be able to recognize differing viewpoints in the decision-making process.

## COURSE OBJECTIVES

At the conclusion of this seminar, participants should be able to:

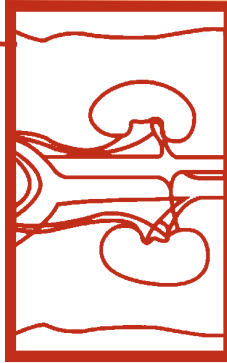

- Summarize how kidney disease develops and the different treatment modalities when kidneys fail.
- Discuss the stages of Chronic Kidney Disease (CKD).
- Understand the relationship between having HIV and the ability to receive a transplant.
- Review the required diagnostic tests for pre transplantation.
- Recognize the post operation signs of rejection after transplantation.
- Discuss patient experiences with different renal replacement therapies.
- Explain why patients go through recovery time after every chronic dialysis treatment.
