PROFESSIONAL EDUCATION & NETWORKING

# Complement-Driven Glomerulopathies: Diagnosis, Current Treatment Landscape, and Patient Journey of C3G and Primary IC-MPGN

**TUESDAY MAY 20, 2025**

5:30pm Networking

6:30pm Dinner and Program

## **Ruth's Chris Steak House**

located in Hilton Columbia Center  
924 Senate St., Columbia, SC 29201

C3G (C3 glomerulopathy) and primary IC-MPGN (immune complex membranoproliferative glomerulonephritis) are rare, progressive, and debilitating complement-driven kidney diseases for which there are no approved therapies. Join us for a discussion on the underlying pathology of these diseases, the diagnostic journey of patients, and the potential of targeting the central complement system.

Audience: renal pathologists, nephrologists, and advanced practitioners

The lecture and dinner are complimentary but registration is required.

Led by **Prince Mohan Anand, MD, FACP, FAST**

*Director of Transplant Services and Kidney Medical Director at the MUSC Health Transplant Program in Mid-Carolinas*
