PROFESSIONAL EDUCATION & NETWORKING

# Complement-Driven Glomerulopathies: Diagnosis, Current Treatment Landscape, and Patient Journey of C3G and Primary IC-MPGN

**THURSDAY MAY 8, 2025**

5:30pm Networking

6:30pm Dinner and Program

**Mez Contemporary Mexican**

5410 Page Rd., Durham, NC 27703

C3G (C3 glomerulopathy) and primary IC-MPGN (immune complex membranoproliferative glomerulonephritis) are rare, progressive, and debilitating complement-driven kidney diseases for which there are no approved therapies. Join us for a discussion on the underlying pathology of these diseases, the diagnostic journey of patients, and the potential of targeting the central complement system.

Audience: renal pathologists, nephrologists, and advanced practitioners

The lecture and dinner are complimentary but registration is required.

Led by **Anthony Chang, MD**

*Professor of Pathology, Director of UChicago MedLabs, Director of Renal Pathology and Renal Pathology Fellowship, and Associate Director of Pathology Residency Program at the University of Chicago Medicine*
