Medication Update for Adult Patients with IgAN

WEDNESDAY, MAY 14, 2025

4:30pm—5:30pm ET

Virtual Zoom Webinar

IgA Nephropathy is a chronic kidney disease characterized by the abnormal accumulation of immunoglobulin A (IgA) in the kidneys. Join an expert-led virtual discussion about medication updates for adults patients with IgAN and the role of the complement system in IgAN. These breakthroughs cast new light on personalized treatment and offer hope for improved outcomes in IgAN patients.

Audience: nephrology care team

Led by **James Tumlin, MD**

*Director of Clinical Research and Professor of Medicine
and Nephrology at Emory University School of Medicine*
