The optimal treatment for most patients with kidney failure is transplantation. And, studies show that the best-functioning, longest-lasting type of transplant comes from a living donor. But the number of kidneys falls far too short of the need. In the U.S.

- **23 million** remain undiagnosed
- **26 million** in total
- Only **10%** know they have CKD
- **$103 billion** Medicare cost

**AMERICAN ADULTS WITH CHRONIC KIDNEY DISEASE (CKD)**

- **19,059 people** were added to the waiting list in 2016
- **35,406 people** were added in total
- **100,000+ people** are waiting for a kidney transplant
- **5,628 living donors** in 2016
- **19,059 received a transplant** in 2016
- **3,848 people** died waiting in 2016

The National Kidney Foundation is the leading organization in the U.S. dedicated to the awareness, prevention and treatment of kidney disease for hundreds of thousands of healthcare professionals, millions of patients and their families, and tens of millions of Americans at risk.
**HOW CAN CONGRESS HELP FIGHT KIDNEY DISEASE?**

**Chronic Kidney Disease Early Detection and Management**
Co-sponsor legislation that seeks to establish a pilot program to help improve care, and outcomes, for patients with chronic kidney disease (CKD). The legislation demonstrates that early detection of CKD, combined with effective and coordinated care that engages patients in the decision-making process, can not only improve clinical results but also lower health care costs.

**Living Donor Protection Act (H.R. 1270)**
Co-sponsor legislation that would prohibit discrimination in life, disability, or long-term care insurance for living donors. The bill also adds living donation to the Family and Medical Leave Act (FMLA).

**Appropriations**
Increase funding in Fiscal Year 2018 for CDC’s Center for Chronic Disease Prevention and Health Promotion to fight Chronic Kidney Disease, the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), and the Health Resources and Services Administration’s (HRSA) Division of Transplantation and Bureau of Primary Care.
