National Kidney Foundation, Inc. Changes Fiscal Year to End on March 31

The National Kidney Foundation, Inc. has changed its fiscal year from June 30 to March 31. As a result, our most recent fiscal year covered the period from July 1, 2014, through March 31, 2015.

The NKF has performed a full review of the annual cycle of its activities and identified several advantages from this change. The cycles of revenue and operating activities will be better aligned and the NKF will be afforded improved planning and budgeting cycles, particularly in its events and signature programs.

This change has been unanimously approved by the NKF Board of Directors in June of 2014. The short fiscal year is consistent with the most recent financial audit of the Foundation, which covers the period of July 1, 2014 through March 31, 2015. This period is also reflected in the most recent IRS form 990 filing.

If you have any comments or questions about the change in the fiscal year, please contact Petros Gregoriou, CFAO at petrosg@kidney.org.
