## New Insights into Lipids and Vascular Calcification in Patients with CKD and ESRD

This program will focus on the role of lipids in promoting vascular calcification in patients with chronic kidney disease (CKD) and end stage renal disease (ESRD). The epidemiology of both CKD and atherosclerosis will be reviewed, along with the mechanisms of vascular calcification. Discussion of the impact of lipid lowering therapy in cardiovascular outcomes and the progression of CKD will be highlighted with the latest clinical trial data.

**Led by Peter A. McCullough**  
**MD, MPH, FACP, FACC, FCCP, FAHA, FNKF, FNLA, FCRSA**  
**Baylor Heart and Vascular Institute**

Dr. McCullough directs cardiovascular education and research for the Baylor Health Care System and is a Vice Chief of Medicine at Baylor University Medical Center. He is an internationally recognized authority on the role of chronic kidney disease as a cardiovascular risk state with over 1000 publications.

After receiving a bachelor's degree from Baylor University, he completed his medical degree as an Alpha Omega Alpha graduate from the University of Texas Southwestern Medical School, his internal medicine residency at the University of Washington, cardiology fellowship at William Beaumont Hospital, and master's degree in public health at the University of Michigan.
